To Whom It May Concern,

This letter serves as a reference for Capital Construction of America. I was the Project Executive for "The Woodlands at Fair Oaks" project located in Fairfax, Virginia. The Woodlands at Fair Oaks project was a wood framed, 105 unit, senior independent living facility. Capital was the siding subcontractor for the project. Capital always performed their work in accordance with the contract documents and met schedule deadlines. Unlike many subcontractors, Capital doesn't ticket the GC for small items throughout the job. Punchlist items are promptly resolved with little resistance. I would be happy to use Capital on future projects.

Sincerely,

Jonathan M. Tibbs
